

Description:

APEX N4060 UV printer is a high-quality digital printing solution for various applications. It features a compact design and is capable of printing on a wide range of materials, including glass, metal, and plastic. The printer is equipped with a UV curing system, ensuring fast and durable prints. It is ideal for businesses looking for a versatile and efficient printing method.

The Epson DX5 printhead is a key component of the APEX N4060 UV printer, providing excellent print quality and reliability. It is designed to handle high-volume printing tasks with precision and consistency.

The APEX N4060 UV printer is available in two models: N4060 and N4060 / 6090. Both models offer a range of printing options and are suitable for various commercial and industrial applications. The printer is easy to use and maintain, making it a practical choice for businesses.
