

Description:

The magic printer trays can help you to create miracle.

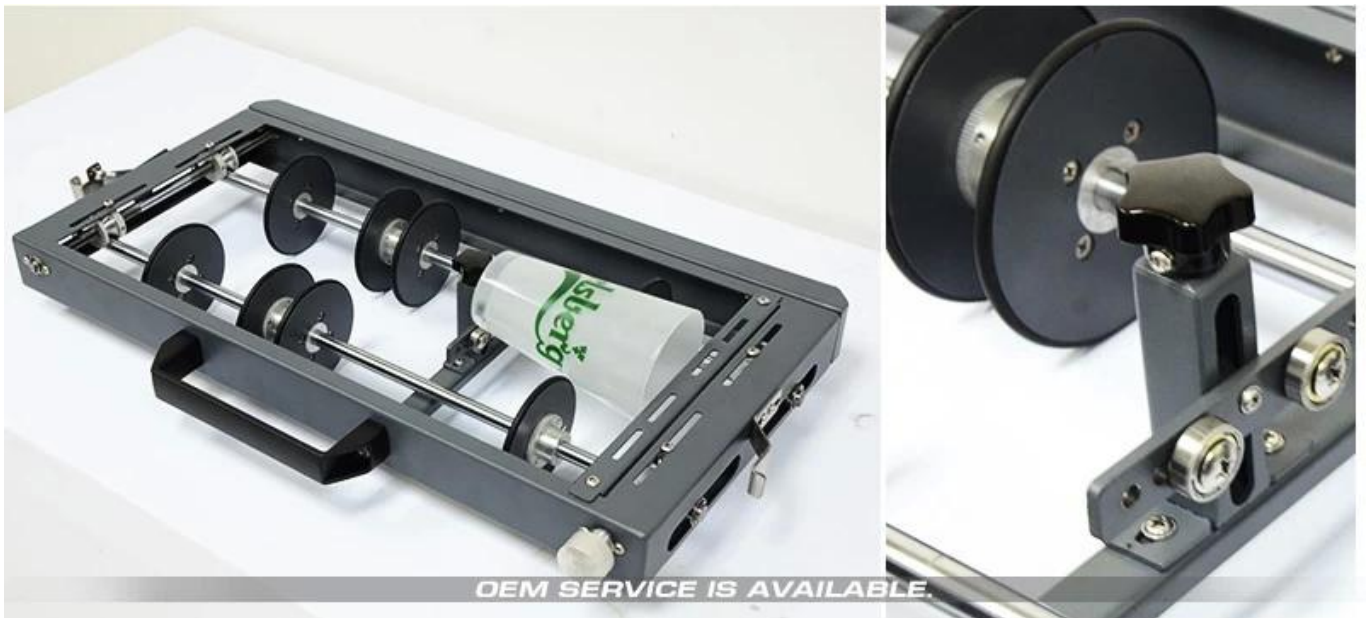

Rotary Printing Attachment

Description: Turn your APEX Flatbed UV Printer into a Rotary Printer in one quick step! Our new rotary printing device attaches quickly to the flatbed, allowing you to print up to 360° on conical and cylinder objects including bottles, glassware, candles, jars and more!

We can provide two models:

-One is for both conical and cylinders, 2 cups/pass. (L*W:60*40cm)

Features:

Simply attaches magnetically to switch from flatbed printing to rotary printing.

Maximize your imprint area by printing the full circumference of cylindrical objects 0.5" to 3.5" in diameter.

Rotary movement is driven by the operation of the bed.

Fits cylindrical objects up to a maximum length of 12.5 inches.

Interchangeable rollers are available to accommodate tapered objects like wine glasses.
